

IN THE CLAIMS:

Please cancel or amend the claims as set forth herein:

1. (Currently Amended) A baseball-style cap with a tubular sweatband comprising:
 - a crown main body having a plurality of panels and a lower peripheral edge;
 - a visor portion secured to a forward portion of said peripheral edge of said crown main body and extending outwardly therefrom;
 - a sweatband sewn along said lower peripheral edge of said crown main body, said sweatband woven of a spun thread material having quick perspiration absorbency to form a tube forming a tubular channel with no need for stitching to form said tube, said tubular channel being ~~which is~~ flattened and sewn with only two substantially parallel lines, each of said lines extending along and adjacent a respective longitudinal edge of said tubular channel to provide a guideline for attaching the sweatband to the crown main body.

Claims 2-5 (Canceled).

6. (Currently Amended) A sweatband for use with a baseball-style cap comprising a fabric portion woven of a spun thread material having quick perspiration absorbency to form a tube, with no need for stitching to form said tube, said tube forming a tubular channel such that, when flattened, two layers of said tubular fabric portion provide moisture absorbency and lie against one another when said sweatband is in use, said sweatband being sewn with only two substantially
